KAWASAKI NATNA LEH MIZO NAUPANGTE

*Dr. F. Elizabeth Lalh mangaih zuali, MD,
Paediatrician*

Kawasaki Disease (KD) hi Mizorama kan hriat lar loh tak natna a ni awm e. Mahse khawvel pum ngaihtuah erawh chuan naupangte zinga thisen zam khawih natna tlanglawn her (most common vasculitis) a ni an ti. Kum 2004 a\lang khan vasculitis dang Henoch-Schonlein purpura aiin case a tam ta zawk hle niin India rama zirchianna pakhat chuan a tarlang. A bikin ram changkang tawh Japan, USA, Canada leh Europe ramah te naupangte lung natna (acquired heart disease) tlentu ber a ni an ti. Kum 1961 January thla khan Dr. T. Kawasaki chuan hetiang natna vei case hmasa ber hi lo hmu chhuakin, a hming chawiin Kawasaki Disease tih a lo ni hlen ta a ni.

Hetiang natna vei report hi Japan ramah an tam ber a, kum tin KD vei thar naupang sing khat chuang an awm thin an ti. Asia mite leh an thlahte zingah hetiang natna vei hi an tam ber a, Caucasian (Mingo) leh African naupangte aiin a letin vei an tam (incidence sang) zawka sawi a ni. Ka classmate thin tuna New Jersey-a awm Paediatric Cardiologist pawhin, "Kar tin case pathum tal hmuhchhuah an awm a, heng zinga tam zawk chu Asian origin an ni," a ti bawk.

Mizorama KD case ka hmu hmasak ber chu kum 2016 April khan a ni a. Chuta tang chuan ka phak ang tawk tawkin he natna hi zirchiangin ka lo tuipui ve a. PGIMER Chandigarh, India ramah chuan KD case an refer khawmna hmupui berah te ka zuk kal ve hial a ni. Kumin 2018 March thla thleng hian Mizo naupang KD vei 12 vel chu ka enkawl ve tawh a ni.

Case za zela sawmriat panga (85%) chu naupang kum 5 chin hnuai lamah hmu a ni

a, a vei te kum chawh rual chu kum 2 a nih laiin thla thum aia la naupang zingah vei hmuh tur an awm meuh lova sawi a ni. Mizo naupang KD vei ka hmuh ve te pawh kum 5 hnuai lam an ni deuh ber a, a upa ber erawh chu kum 12 a ni. KD nei ka lo enkawl ve tawh 12 zingah hian a tam zawk (8) chu mipa an ni. Mizoram pawnan an lo zirchiannaah pawh hmeichhe naupang aiin mipa naupang KD vei an tam zawk a ni.

He natna tlentu tak hi vawiin thlengin hriatchhuah a la ni lo va, amaherawhchu Parovirus, Staphylococcus aureus, Epstein- Barr virus, Chlamydia leh Mycobacteria te nena inkungkaiha hriat a ni. KD case ka enkawl ve tam ber pawh hi hrawk thip, khuh, leh pan nasa deuh nei an ni a, culture pawhin Staphylococcus aureus to (growth) hmuh a ni thin.

KD lan chhuah dan tlangpui hetiang hian han sawi ila :

1) Acute febrile Phase (ni 14 chhung):

Khawsikin a intan thin a, hemi hun chhung hian a tlangpuiin an awm a nuam lovin an chiau hiar (irritable) hle thin. Ni 3 atanga ni li vel chu an nghawng \hal a vung (cervical adenitis) a, an mit a nat (conjunctivitis) bakah an lei te pawh a sen hler hlur thin (Strawberry tongue) a, an heh te pawh a rovin a khi/rep hial thin a, taksa vual leh ser deuh churin an kut te pawh a vung thin a ni. Vei atanga ni 6-na velah an mawngkaw bul vun a lip (perianal desquamation) thin. Enkawl lova an awm pawhin vei atanga ni 12-na velah chuan heng natna hnathawh tarlan tak te khi a lo ziaawm ve duak thin. Mahse hetiang hunlai hian lung vung (Miocarditis) an nei thei a, lung phu rang (tachycardia) leh lung na (congestive cardiac failure) te chu a natna hnathawh lan chhuah dan ber a ni. KD enkawlna atan dam lovin KD a vei atanga ni 10-12 chhunga Intravenous

immunoglobulin (IVIg) pek hian awmzia a nei (effective) ber bawk a ni.

2) Sub-acute Phase (kar 2-kar 4):

Tarlan tawh angin IVIg hi acute phase a pek hman chuan dam lovin an thatpui rang ber a ni. Hemi chhunga damlovin damdawi hi a dawn loh chuan Sub-acute Phase-ah an lut thin a. A lan chhuah dan tlangpui te chu: kut leh ke tin bul atangin vun a inlip (periungual desquamation), platelet count sang (Thromocytosis) a ni a, damlo thenkhat chuan Arthritis (ruh chuktuah v_<ng) an nei bawk thin a ni. A tlangpuiin dam lovin hetiang hunah hian lunga thisen zam puar (coronary artery aneurysms) an nei thin a ni. Ka case hmuh tam zawk chu Thromocytosis leh coronary artery aneurysms nei an ni tlangpui a ni. Hemi hun chhung hian damlo chu tha leh ziaawm deuh angin lang mahse a dinhmun chiah hrechiang turin echocardiography tih ngei theih nise a tha hle a ni.

3) Convalescent Phase (dam kawr lai):

Natna intan atanga chawlkar 4-8 vel chhung hei hian a huam a. Hemi hun chhung hian damlo kut tin-ah khuar (horizontal ridging of nails 'Beau lines') a awm thin a ni. Acute phase reactants, entir nan, C reactive proteins leh ESR (indirect acute phase reactants) te hi Convalascent phase thlen hma (acute & sub-acute phase)-ah te khian an sang thin a ni. Convalascent phase-ah erawh hi chuan normal level-ah an tla hniam tavv thin thung a ni.

Enkawl dan tlangpui

KD enkawlna atana hman ber chu Intravenous immunoglobulin (IVIg) a ni a. A natna lan chhuah atanga ni 10-12 chhunga pek hian awmzia a nei (effective) hle a. IVIg pek dan hi 2 gm/kg in darkar 12 leh 24 inkar chhungin infusion in pek tur a ni. Damdawi hi dam lovin hua anga a lan (allergic reaction) loh chuan minutes

15-30 hnuah infusion san chhoh zel tur a ni bawk. Platelet count san dan a zir leh echocardiography result azirin aspirin tablet hi pek tel a ngai bawk a. IVIg hi damlo 80- 85 % in an that pui (response) a ngaih a ni. IVIg pek atanga darkar 36 liam hnuah pawh khawsik a la awm chuan IVIg resistance anga ngaih theih a ni. Chung damlovah chuan IV methylprednisolone emaw TNF a blockers (entir nan, infliximab) te hman zawk tur a ni. Ka lo enkawl ve tawh KD te chuan IVIg hi an thatpui (response) a, resistance case tak tak hmuh ka la nei lo. IVIg hi Mizoramah awlsam taka lei mai tur a awm loh thin avangin platelet count lo sang tawh (thrombocytosis) leh coronary artery aneurysms lo nei hman tawh te chu hmun puia an enkawl danin IVIg kan neih theih hma chuan damdawi awlsam zawka hmuh theih IV methylprednisolone 30mg/kg/day x 3 days (ni thum chhung) ka lo pe tan thin a ni.

KD hi a hun taka hmuh chhuah leh enkawl a pawimawh hle. Mizo naupangte zingah KD nei eng emaw zat hmuh chhuah lohin an la awm ngein a rinawm. He natna hi a hun taka enkawl loh chuan lunga thisen zam (coronary artery) a khawih thin vangin natna hlauhawm tak thihpui hial theih a ni.
